

## Running a Speed Test

1. Go to <https://speedtest.telstra.com/> before running the speed test make sure the server is set to Telstra Sydney

2. Run three speed tests and record the download and upload results

79.5 Mbps

### Download speed

Download refers to activities such as **streaming video**, **downloading files** and **browsing the web**.

30.5 Mbps

### Upload speed

Upload refers to activities such as **sharing photos on social media** and **storing files on cloud storage** (e.g Dropbox, Google Drive).

3. Preferably you want to run these speed tests with a wired connection, make note of what device they are recording the speed test from.
